Dear \*\*\*\*\*

**Re: Brief description of a typical Schlegel Weatherseal**

Schlegel's Weatherseals are a composite product made of a flexible polyether/polyurethane (PU) foam core, a polypropylene (PP) insert feature and a polyethylene (PE) outer liner. See diagram below.

The description represents a typical Weatherseal; details may vary depending on application. If further information is required please contact me.

For non inserted profiles the polyprop is replaced with Glass Fiber cord for low stretch performance

Yours sincerely

Sam Speirs (Technical)
